

## Climate Change

What actually is it? Is it happening? How might it be impacting us? Can we stop it?

## Physical Geography

We continue to develop our understanding of the world we live in – focusing on rivers.

## Shrinking Rainforests

Where are our rainforests? Why are they so important? Why are they at risk and what can we do?

## World Cities

What are megacities? Where are they?

What happens when a city like Rio de Janeiro grows too quickly?

## Our Frozen Planet

What are glaciers and how are they formed?

Where in the world are they found?

## India

With one of the biggest populations in the world, India is a land of diversity and culture. So, what is it like? What are its characteristics?

## Geographical Information Systems

What is GIS?

Why is it such an important tool? Why is there a demand for Geographers who can use it?

## Growing Deserts

Where are our deserts? What are they like? Why are they growing? How can we stop them from growing?

## World Cities

What challenges do we face in our cities in the UK? How can we manage these?

## Our Frozen Planet

Places affected by glaciation – what are the challenges? What are the opportunities?

## India

Is India an LIC, NEE or HIC?

How does India compare with other countries?

## Geographical Information Systems

How can GIS be used to help us to understand our world?

To Year 9 ...
