

# Numeracy Challenge

2017 is a prime number - the first since 2011, and the last until 2027

Today's Challenge is to fill the blanks in the following equation, so that it makes arithmetical sense:

$$10 \ 9 \ 8 \ 7 \ 6 \ 5 \ 4 \ 3 \ 2 \ 1 = 2017$$

You can use any of the basic mathematical operations, +, −, x, ÷, and as many brackets as you like.
